## Call for Presentation Proposals

The Great Plains Telehealth Resource and Assistance Center's 2019 Annual Regional Telehealth Conference will be April 28-30 at the Radisson Blu Hotel in Bloomington, Minnesota. The theme of this year's conference is ***Telehealth Everywhere!***

This year's conference will feature up to five tracks focused on the following domains:

- **Enterprise Telehealth** (large, mature, multi-specialty telehealth programs)
- **Mental Health** (Community Mental Health Centers and MH/SUD treatment)
- **Primary Care and Rural Hospitals** (FQHCs, RHCs, and CAHs)
- **Clinical Training & Research** (nursing and other clinical training programs, curriculum development, research)
- **Telehealth Technologies** (Equipment, Broadband, Security)

Each track will contain up to four 60-minute presentations. Multiple proposals may be accepted for 10-minute presentations and combined into a "rapid report" session.

Presentations should be high quality and free of commercial bias. Conference exhibitors are encouraged to support their customers to develop educationally focused presentations.

Presentations should focus on one of the following themes within a chosen track:

1. Clinical programs (clinician and patient experience, clinical outcomes and processes)
2. Program administration and development (community need, planning, development, administration, operations, policies, and program evaluation)
3. Legal, regulatory, and/or billing and reimbursement issues

Submissions will be judged on appropriateness for the conference/track, overall quality, and evidence of originality, innovation, effectiveness, and impact.

**Download applications at: <http://gp trac.org/conference>.**

**Applications are due January 31, 2018.**
